What corrections did you have to make?

I added an 'alt' attribute for each of the img element, and added an aria-label attribute for each button.

Do you think your website is usable if you turn off the CSS? Why or why not?

Yes. I turned off the CSS on my website. All the functioning elements remain.

Is your site is tabbable? In other words, without the use of the mouse, are all the links and buttons accessible using the tab key?

For now I think only the article section is tabbable. The sidebar, header, nav and footer are not.
